MASTER OF SCIENCE

DISASTER AND HEALTH

CRISIS MANAGEMENT

DISASTER AND HEALTH CRISIS MANAGEMENT

MASTER OF SCIENCE

The Master of Science in Disaster and Health Crisis Management is a **two-year** MSc entirely in **English**. It is a **blended program**, offering a combination of online and on-campus activities. The face-to-face classes are held in **Vercelli**.

It aims at equipping its students with essential skills for understanding national and international crisis scenarios and implementing a **systemic approach to emergencies, disasters, and health crises**.

The curriculum proposed is highly **interdisciplinary**. It includes training activities in the fields of psychology, sociology, and politics in emergency, disaster, and humanitarian crisis contexts, as well as in international humanitarian law and disaster management. It covers also historical and geographical aspects related to disasters and humanitarian crises, and provides economic knowledge in the field of integrated emergency management, including resilience, capacity building, and business continuity.

The training path includes seminars, distance and in-person group work, virtual reality simulations, tabletop exercises, and full-scale exercises based on real events, with the aim of applying the knowledge acquired during the course of study and providing both technical and non-technical skills considered essential for fieldwork. In the fourth semester, all students must complete a non-paid internship of 450 hours (18 CFU) in an institution, company, research center, NGO, or governmental body active in the field of health crisis management.

TEACHING PLAN

FIRST YEAR

FIRST SEMESTER		CFU*	SSD
Governance and sociology of disasters, and health crises	Emergency and disaster governance	6	SPS/11
	Sociology and social analysis of crises and disasters	6	SPS/07
Disaster law and human rights	Private and disaster law	4	IUS/01
	Human rights and protection of people	4	IUS/07
	International humanitarian and disaster law	4	IUS/14

SECOND SEMESTER

Geography of conflicts, disasters, and health crises	Geography of conflicts, disasters, and health crises	6	M-GGR/02
Economics, finance and supply chain in disasters and health crises	Economic policy in disasters and humanitarian crises	6	SECS-P/02
	Economics applied to disasters and humanitarian crises	6	SECS-P/03
	Finance and supply chain management in disasters and humanitarian crises	6	SECS-P/06
Global Health and Disaster Medicine	Disaster medicine	4	MED/41
	Global health and public health emergencies	4	MED/42

SECOND YEAR

FIRST SEMESTER		CFU*	SSD
Disaster and humanitarian health	Emergency medicine	2	MED/09
	Disaster medicine	4	MED/41
	Epidemiology and research in disasters and humanitarian crises	4	MED/42
	Forensic medicine and human rights	2	MED/43
	Nursing sciences applied to disasters and humanitarian crises	1	MED/45
	Technical medical sciences applied to disasters and humanitarian crises	2	MED/50

SECOND SEMESTER

Natural and technological hazards, and technologies applied to disasters	Geological, climatic risks and environmental monitoring	3	GEO/12
	Informatics and technologies applied to disasters and health crises	3	INF/01
	CBRNE events and chemistry applied to disasters and health crises	3	CHIM/02
Ethics and non-technical skills in disaster management	Ethics	1	M-FIL/03
	Personal identity	1	M-FIL/05
	Project Management	1	SECS-P/07
